PROJECTS

BENZ BAKERY

[VISIT PROJECT](#) ↗

Benz Bakery is a professional web application developed using the MERN stack. It uses React.js and CSS for a responsive front-end and Node.js with Express.js for a strong back-end, achieving smooth navigation using React Router and Redux Toolkit. MongoDB and Mongoose handle data effectively. Deployed on Vercel and Render.com .

Key Features:

Responsive Design: Ensures the application looks good on all devices, from desktops to mobile phones.

Smooth Navigation: React Router facilitates seamless transitions between different sections of the site.

Form Validation: Ensures that user inputs in login and signup forms are correctly formatted and meet predefined criteria.

Performance Optimization: Lazy loading loads React components and images only when needed.

PORTFOLIO

[VISIT PROJECT](#) ↗

I created a clean and responsive portfolio website using React.js and CSS to showcase my projects, talents, and contact information.

BUBBLE GAME
